

Your Dry Hair

Personalized Hair Routine Guide

"Deep hydration is your top priority"

Dry hair lacks moisture in the cortex and often has a raised, damaged cuticle that makes it look dull, feel rough, and break easily. The cause can be genetic, environmental (sun, wind, hard water), or from overuse of heat and chemical treatments. This routine is built entirely around restoring and locking in moisture at every step.

Your Step-by-Step Routine

Step 1: Shampoo (every 3–4 days)

Use a hydrating, sulfate-free shampoo. Dry hair should not be washed daily — each wash strips some natural oil. Look for formulas with hyaluronic acid or glycerin.

Step 2: Conditioner (every wash)

Use a rich, creamy conditioner. Apply from mid-lengths to ends, leave for 5 minutes, and rinse with cool water to seal the cuticle.

Step 3: Weekly Moisture Mask

Apply a deeply hydrating mask (not protein — moisture only) once a week. Leave on for 20–30 minutes under a shower cap. This is the single most impactful step for dry hair.

Step 4: Leave-in + Oil

Apply a leave-in conditioner on damp hair, then seal with a lightweight oil (argan, jojoba). The oil traps moisture inside the strand.

Step 5: Limit Heat

Air-dry whenever possible. When using heat, always use a protectant and keep the temperature below 350°F / 175°C.

Do's & Don'ts

- | | |
|--|--|
| ✓ Use a weekly moisture mask — every single week | ✗ Don't use sulfate shampoos — they strip moisture |
| ✓ Apply leave-in conditioner every wash | ✗ Don't wash daily |
| ✓ Seal with a lightweight oil after leave-in | ✗ Don't use heat above 350°F / 175°C |
| ✓ Sleep on a silk or satin pillowcase | ✗ Don't skip heat protectant |

✓ Drink enough water — internal hydration matters

✗ Don't use clarifying shampoo more than once a month

Ingredients to Look For & Avoid

Look For

- ✓ Hyaluronic acid
- ✓ Glycerin
- ✓ Aloe vera
- ✓ Argan oil
- ✓ Jojoba oil

Avoid

- ✗ Sulfates (SLS/SLES)
- ✗ Alcohol denat
- ✗ Clarifying agents frequently
- ✗ Heavy protein (can make dry hair brittle)
