

Your Normal Hair

Personalized Hair Routine Guide

"Maintain your balance with quality everyday products"

Normal hair has a healthy moisture-protein balance, manageable frizz, and a natural shine. Your goal is maintenance — keeping what you have rather than correcting a problem. A consistent, quality routine prevents damage and keeps your hair looking its best every day.

Your Step-by-Step Routine

Step 1: Shampoo (every 2 days)

Use a balanced, gentle shampoo suited to your hair length and density. Avoid over-washing, which can tip the balance toward dryness.

Step 2: Conditioner (every wash)

Apply a medium-weight conditioner from mid-lengths to ends. Leave for 2–3 minutes. You have flexibility here — experiment with different formulas to find what gives you the best shine.

Step 3: Weekly Treatment (optional)

A light protein treatment or shine mask once a week keeps normal hair in peak condition and prevents future damage.

Step 4: Styling

You have the most flexibility of any hair type. Experiment with styling creams, serums, or sprays. Always use heat protectant before any hot tools.

Step 5: Maintenance

Trim every 8–10 weeks. Normal hair is forgiving, but regular trims prevent split ends from travelling up the shaft.

Do's & Don'ts

- | | |
|---|---|
| ✓ Maintain a consistent wash schedule (every 2 days) | ✗ Don't over-wash — it disrupts your natural balance |
| ✓ Use a heat protectant before any hot tools | ✗ Don't skip heat protectant |
| ✓ Experiment with products — normal hair is versatile | ✗ Don't use heavy oils daily (can make hair greasy) |
| ✓ Trim every 8–10 weeks | ✗ Don't ignore early signs of damage (split ends, dullness) |

- ✓ Use a weekly shine treatment to maintain lustre

Ingredients to Look For & Avoid

Look For

- ✓ Panthenol
- ✓ Glycerin
- ✓ Lightweight silicones
- ✓ Hydrolysed proteins (light)
- ✓ Vitamin E

Avoid

- ✗ Heavy butters daily
- ✗ Alcohol denat
- ✗ Clarifying agents frequently
